

Business Analyst Internship @Talview

Who We Are

Hiring is still stuck in the past. Manual screening. Unconscious bias. Candidates are waiting weeks for feedback. Organizations drown in admin work instead of finding real talent.

We're fixing that with AI that works.

Talview builds Gen AI-powered solutions that make hiring and assessment faster, fairer, and scalable. We automate the busy work—interview scheduling, candidate screening, exam proctoring—so organizations can focus on what matters: discovering great people.

Meet our AI team:

- **Alvy:** The world's first AI Proctoring Agent—intelligent exam monitoring that scales globally
- **Ivy:** Our conversational AI Interviewer transforming first-round screenings with zero bias

The impact? 10M+ assessments delivered, 120+ countries served, trusted by leading global organizations.

The Role

As a Business Analyst Intern at Talview, you'll be the bridge between our customers and product teams—turning complex business requirements into clear, actionable solutions that power hiring and assessment workflows globally.

You'll work closely with project leads, product owners, engineers, and customer success teams to drive implementations, ensure quality, and deliver outcomes that matter.

What You'll Do

- **Discover & define requirements** → Evaluate business processes, conduct requirements discovery, and highlight areas for improvement
- **Own the regional backlog** → Act as the product owner for the regional scrum team
- **Drive process reviews** → Conduct ongoing reviews of business processes and solution designs

- **Stay product-sharp** → Keep up to date on the latest Talview product features and functionalities
- **Run cadence meetings** → Conduct regular internal and customer cadence meetings and ensure minutes are shared
- **Support the SDLC** → Assist Project Leads with user stories, test reviews, and solution evaluations
- **Document everything** → Create business requirements docs, solution designs, release notes, and user stories
- **Collaborate cross-functionally** → Work with Product, DevOps, and Customer Success teams for on-time deployments
- **Drive UAT** → Assist Customer Success and business users during user acceptance testing
- **Track & report** → Collaborate with Project Coordinators on weekly implementation status reports and RAG readouts
- **Optimize resources** → Assist in resource loading, project planning, and effort optimization for the regional scrum
- **Enable handovers** → Train and hand over to Technical Support and Customer Success teams' post-deployment
- **Shape the roadmap** → Work on requirements for innovation projects that feed into the eventual product roadmap

You Might Be a Fit If...

You have:

- Bachelor's degree in engineering
- MBA in Operations, Finance, or Human Resources (Optional)
- Exceptional analytical and problem-solving ability
- Experience working across time zones (APAC or Americas), cultures, and cross-functional teams
- Excellent communication and documentation skills
- Experience creating detailed reports and giving presentations
- Competency in Microsoft Office (Word, Excel, Outlook)

- Strong planning, organizational, and time management skills

Bonus points for:

- Proficiency with GitHub and linear
- Familiarity with project management
- Understanding of Agile/Scrum methodologies

What Makes This Role Different

- ✓ **Bridge business & technology** → Translate complex customer requirements into clear, implementable solutions
- ✓ **Own outcomes end-to-end** → Drive implementations from discovery through UAT to deployment and handover
- ✓ **Work with global customers** → Collaborate across time zones, cultures, and industries on mission-critical hiring solutions
- ✓ **Shape the product** → Your innovation requirements feed directly into Talview's product roadmap
- ✓ **Grow your career** → Gain deep expertise across product, project management, and customer success

Our Culture: The 5Cs

We're built on **Collaboration, Commitment, Credence (trust), Customer-centricity, and Candor**. Translation? We work together, ship quality, trust each other, obsess over users, and keep it real.

The vibe:

Our team includes off-roaders, bikers, table tennis champions, cricketers, marathon runners, musicians, gamers, and pretty much every flavor of human. We have thriving

families and happy singles. You'll find your crew here—and you're welcome to bring talented friends along.

What You Get

Beyond the learning curve and career launchpad, here's what comes with the role:

- **Competitive salary** (because life in Bengaluru isn't free)
- **Fully stocked pantry** with healthy fruits, snacks, and gourmet coffee to fuel your productivity
- **The tools you need** → Whatever equipment and software helps you do your best work
- **Monthly team lunches** and annual team building offsites
- **Team gatherings and celebrations** → Actual fun, not forced corporate bonding
- **Career acceleration** → Extraordinary opportunities to grow with a scaling company
