OPPORTUNITY

PPO Potential

ABOUT THE ROLE

Pallav Technologies is a fast-growing fintech company helping banks and NBFCs improve loan collections through technology, analytics, and operations. As a Data Analyst Intern, you will work with high-volume business and collections data, translate analysis into clear recommendations, and help teams improve operational outcomes.

WHAT YOU'LL DO

- Analyze large collections and business datasets to identify patterns, trends, and opportunities for improvement.
- Perform root cause analysis to explain changes in recovery rates, agent productivity, customer behavior, and operational performance.
- Write SQL queries and use Python or R to extract, clean, join, and analyze data from multiple sources.
- Build dashboards, reports, and visualizations that make key business and operational metrics easy to track.
- Tackle real-world business questions and recommend practical actions backed by data.
- Conduct ad hoc analysis and present clear insights to business and operations teams.
- Support the automation of recurring reports and analytical workflows.
- Partner with product, operations, and leadership teams to strengthen data-driven decision-making.

WHO WE'RE LOOKING FOR

- Final-year B.Tech/B.E. student graduating in 2026 or 2027.
- Specialization in Data Science, Artificial Intelligence, Machine Learning, Computer Science, or a related field.
- Strong analytical thinking and structured problem-solving skills.
- Comfort working with numbers, datasets, and business questions.
- Advanced knowledge of SQL, Excel, Python, or R.
- Eagerness to learn and contribute in a fast-paced startup environment.

PREFERRED SKILLS

SQL

Excel

Google Sheets

Python

R

Statistics

Data Analysis

Visualization

Prior Data Science, Analytics, or AI internships are valued. Research projects, published papers, or participation in relevant conferences and hackathons are an added advantage.

WHAT YOU'LL LEARN

- Real-world data analysis in fintech.
- Dashboard building and business reporting.
- Applied SQL and database concepts.
- Problem-solving and recommendation design using data.
- Collections, lending, and financial analytics.

WHY JOIN PALLAV

- Work on business problems with a direct impact on company performance.
- Gain hands-on exposure to large-scale fintech operations.
- Learn directly from experienced founders and business leaders.
- Take meaningful ownership in a fast-moving startup environment.
- Top-performing interns may be considered for a Pre-Placement Offer and full-time opportunity.
