

The FUTURE

is electric, and
Schneider Electric is shaping it.

Create your future with the digital transformation of energy management and automation. At Schneider Electric we offer graduate opportunities and internships.

About Schneider Electric

Schneider Electric is a global leader in energy technology, driving efficiency and sustainability through electrification, automation, and digitalization. With approximately 160,000 employees and a network of over one million partners across more than 100 countries, Schneider Electric helps businesses, industries, data centers, infrastructure providers, and homes become more energy-efficient, resilient, and sustainable. The company offers innovative solutions spanning energy management, industrial automation, software, digital services, and AI-enabled technologies, enabling customers to optimize performance while accelerating their sustainability goals.

About Schneider Electric, R&D

Established in 2002, our India R&D Centre is the 2nd largest of its kind in the Schneider world after France. Here, highly qualified cross-functional technical teams work on bringing our products to life, across all phases of the Product Development cycle. This helps us realize our purpose of providing energy and automation digital solutions for efficiency and sustainability. We combine world-leading energy technologies, real-time automation, software, and services into integrated solutions for Homes, Buildings, Data Centers, Infrastructure, and Industries.

At Schneider Electric, we believe access to energy and digital is a basic human right. We empower all to make the most of their energy and resources, ensuring Life Is On everywhere, for everyone, at every moment. Process standardizations, seamless system integration, and robust data and cybersecurity measures, by optimizing technology to drive efficiency and innovation within the enterprise.

Important Information about the Schneider Electric University Program

Stipend & Compensation:

- INR 9 LPA + 3 LPA Sign on Bonus for B. Tech for a Full-Time Role
- INR 9.5 LPA + 3 LPA Sign on Bonus of M. Tech for a Full-Time role
- 35,000 INR per month stipend for Internship only role
- Job Location: Pan India
- This is an Indicative Job Description (JD) about our R&D division. We request all the students to go through the same. The students should also be flexible and open to work in any of these Sub Departments if selected for Internship/ Full-Time role or Internship and Full Time Role

1. Job Description- Graduate Engineer Trainee - DE Solutions

About the Role

We are looking for passionate and talented candidates to join our team.

As a Graduate Engineer Trainee, you will work on developing software solutions for next-generation embedded and connected products. You will collaborate closely with Firmware and Hardware teams to design, develop, test, and optimize software features that power innovative technology solutions.

This role provides an excellent opportunity to gain hands-on experience in system-level software development, cross-functional engineering collaboration, and product delivery in a fast-paced R&D environment.

Key Responsibilities

- Develop, test, and maintain software components for embedded and connected systems.
- Collaborate with Firmware and Hardware engineers to understand product architecture and system interactions.
- Participate in software design, coding, debugging, and performance optimization activities.
- Analyze and troubleshoot software issues across multiple layers of the technology stack.
- Create and maintain technical documentation, test plans, and design specifications.
- Contribute to automation, validation, and continuous integration activities.
- Learn and apply software engineering best practices, coding standards, and quality processes.
- Participate in code reviews and technical discussions within agile development teams.

2. Job Description- Graduate Engineer Trainee - Energy Management

About the Role

We are looking for enthusiastic and motivated candidates to join our Edge Control Platform teams.

As part of the team, you will contribute to the development, testing, and validation of software solutions used in edge control, automation, connectivity, and device management systems. Depending on your interests and skills, you may work in software development, test automation, system integration, or platform engineering.

Key Responsibilities

- Contribute to the design, development, testing, and maintenance of platform features and applications.
- Support the development of automated test solutions and quality assurance activities.
- Participate in debugging, troubleshooting, and resolving software or system-related issues.
- Work on device integration, configuration, and validation activities.
- Collaborate with cross-functional teams including software developers, testers, product owners, and system engineers.
- Assist in improving development, testing, and deployment processes.
- Learn and apply industry best practices in software engineering, automation, and system design.

What We're Looking For

- Strong interest in software development, test automation, industrial automation, IoT, or edge computing platforms.
- Basic knowledge of programming concepts and software engineering fundamentals.
- Familiarity with languages such as Python, C++, C#, JavaScript, or similar is an advantage.
- Understanding software testing principles, automation frameworks, or device communication concepts is a plus.
- Analytical thinking and problem-solving skills.
- Good communication and collaboration skills.
- Eagerness to learn new technologies and work in a dynamic environment.

3. Job Description- Graduate Engineer Trainee - DE Solutions

We are looking for highly motivated students to join our team.

What We're Looking For

- Programming in C and C++
- Basic knowledge of Python
- Fundamentals of Operating Systems
- Understanding of Basic Electronics
- Knowledge of Embedded Systems concepts and applications
