

Trainee Engineer Internship

Development | Operations | Security

Bangalore

Why Choose Bottomline?

Are you ready to transform the way businesses pay and get paid? Bottomline is a global leader in business payments and cash management, with over 35 years of experience and moving more than \$10 trillion in payments annually. We're looking for passionate individuals to join our team and help drive impactful results for our customers. If you're dedicated to delighting customers and promoting growth and innovation, we want you on our team!

Required Qualifications

We are looking for dynamic and innovative Trainee Engineers to join our team in Bangalore, bringing curiosity, creativity, and a passion for leveraging AI as a core way of working to solve real-world engineering challenges. If you have the attributes and foundational skills listed below, we would like to hear from you.

- Candidates must have a BE/B.Tech in CSE, IT or IS with a minimum of 80% or 8 CGPA, graduated in 2026.
- Demonstrated interest in leveraging AI tools and technologies to improve engineering productivity, learning, problem solving, and innovation.
- Flexible and open to learning different technologies, tools, and engineering practices.
- Excellent communication skills, attention to detail, and a strong sense of responsibility.
- Strong aptitude, logical thinking, analytical ability, and problem-solving skills.
- Willingness to work flexible hours, when required, to accommodate meetings across time zones.
- A positive, collaborative and can-do attitude, with a strong orientation toward self-learning and growth.

Engineering Tracks and Skills

Based on business needs, candidate interests and demonstrated skills, interns may be assigned to one of the following areas.

Software Development

- Programming fundamentals in Java, .NET, Python, or comparable object-oriented language.
- Understanding data structures, algorithms, object-oriented design, and debugging.
- Awareness of secure coding, cloud concepts, modern software testing & CI/CD practices and AI-assisted development tools.

AI Engineering

- Understanding of AI-assisted engineering practices and responsible use of AI tools.
- Familiarity with Generative AI concepts, Large Language Models (LLMs), AI agents, and intelligent automation.
- Awareness of networking and operating systems fundamentals, cloud infrastructure, and deployment pipelines.
- Interest in leveraging AI to improve operational efficiency, reliability, troubleshooting, and engineering productivity.

Data Engineering

- Basic knowledge of Python, SQL, data analysis, machine learning, or generative AI concepts.
- Curiosity and passion for AI, data, and technology innovation.
- Responsible AI mindset with an understanding of accuracy, privacy, governance, and ethical considerations.
- Support the development and testing of AI & Data solutions, evaluate results for quality and accuracy, and document key learnings. Work closely with technical and business teams to communicate insights and improve outcomes.

Security & Automation

- Understanding information security fundamentals, network security, identity, and access management.
- Awareness of common application-security risks, including OWASP principles and secure coding practices.
- Ability to analyze logs, investigate alerts, and support vulnerability assessment and remediation.
- Strong interest in governance, risk, compliance, data protection, and continuous security learning.

What You Will Do

- Learn and apply engineering practices while contributing to internship projects, real product, platform or security initiatives under guidance.
- Adopt AI as a core way of working by using AI-assisted tools for software development, operations, data Engineering, security investigations, documentation, testing, troubleshooting, and knowledge discovery, while ensuring responsible and effective use of AI-generated outputs.
- Demonstrate ownership, curiosity, responsible use of technology, and a customer-focused mindset.

Internship Details

Item	Details
Type of Employment	Internship: January to June 2027
Location	Bangalore
Hiring Process	Pre-Placement Talk → Resume Screening → Technical Discussion Rounds → Final Interview → Offer
Compensation	Internship stipend: INR 60,000 per month for 6 months (Jan to June 2027)

Equal Opportunity

We welcome talent at all career stages and are dedicated to understanding and supporting additional needs. We are proud to be an equal opportunity employer, committed to creating an inclusive and open environment for everyone.
