

CIRCULAR

NPTEL Course Registration

1. Students who are interested in registering for any course offered by SWAYAM – NPTEL may refer to the link (<https://onlinecourses.nptel.ac.in/>) to know about the courses that are being offered for the July 2026 session and proceed further. **Students should register on SWAYAM – NPTEL with the VIT Student mail id only.** (Should not use personal mail id)
2. Only one SWAYAM - NPTEL course per student will be permitted for credit transfer during Fall 2026-2027.
3. Students who have registered and completed the NPTEL course during the previous semester(s) are also permitted to register for one course on VTOP during this semester to earn the credits.
4. Maximum credits permitted for credit transfer is limited to the number of credits specified under the University Elective (UE) / Open Elective (OE) Category as applicable for the students of all the Programmes.
5. Students can register for the course after getting approval from the School Academic Coordinator (contact the School Office to know the details of the Academic Coordinator).
6. Approval from the Academic Coordinator is a mandatory requirement. After the approval, the students may register for the NPTEL course directly (<https://onlinecourses.nptel.ac.in/>).
7. After successful completion of the online course, the student should upload the weekly progress sheet and the final course completion certificate (as one pdf file) on V-TOP.
8. Absolute grading methodology will be followed and the existing academic regulation will be followed for deciding the grade.
9. Credits registered for online courses will be in addition to the maximum credit (27) permitted for the Fall Semester 2026-2027.
10. Students have to pay the examination fee related to the NPTEL Course by themselves.
11. The option for grade improvement is not available for the online courses.
12. If a student registers for the maximum number of credits under UE / OE, then the current registration for the online course becomes automatically invalid, and the credits will not be transferred even if the student completes the online course.
13. If a student registers for a course in the regular mode at VIT and an online course offered by NPTEL during the same semester, then the course registered in the regular mode at VIT is considered for grading. This condition applies if the maximum credit limit in UE/OE is reached.
14. If a student registers for a course in the regular mode at VIT and an online course offered by NPTEL during the same semester and clears the NPTEL course but not the course in regular mode, then the grade obtained in the NPTEL course will not be substituted for the failed (N / F) course registered in the regular mode. As per the rule, courses registered in the same semester cannot be substituted with each other.
15. In case of additional queries, the student is required to meet the concerned School Academic Coordinator.

M. Anthony Xavier PhD
Dean, Academics
