

JD – Program Intern

Duration

6 Months (Internship)

About the Role

We are looking for a highly motivated and detail-oriented Program Intern to support cross-functional program execution, operational coordination, and process improvement initiatives. This role provides an excellent opportunity to work closely with engineering, operations, supply chain, finance, and leadership teams while gaining hands-on experience in program management.

Key Responsibilities

1. Program Execution

- * Track project timelines, milestones, and deliverables across multiple programs.
- * Follow up with stakeholders to ensure timely completion of action items.
- * Maintain project trackers, dashboards, and status reports.
- * Support planning and execution of new initiatives and product development programs.
- * Escalate risks, blockers, and delays in a timely manner.

2. Cross-Team Operations Management

- * Coordinate with cross-functional teams including Engineering, SCM, Manufacturing, Finance, Quality, and Operations.
- * Organize meetings, prepare MOMs, and track closure of action items.
- * Ensure smooth communication and information flow between teams.
- * Support data collection, consolidation, and reporting for leadership reviews.
- * Assist in resolving operational dependencies across departments.

3. Process Optimization

- * Identify opportunities to improve existing processes and workflows.
- * Create and maintain SOPs, process documentation, and trackers.
- * Support automation initiatives using Excel, Google Sheets, Power BI, or similar tools.
- * Analyze operational data and generate actionable insights.
- * Drive standardization and continuous improvement initiatives.

Desired Traits

- * Strong ownership and execution mindset.
- * Highly organized with excellent attention to detail.
- * Ability to work in a fast-paced, cross-functional environment.
- * Quick learner with a proactive approach.
- * Comfortable handling multiple tasks simultaneously.

What You'll Gain

- * Exposure to end-to-end program management in a high-growth organization.
- * Hands-on experience working with leadership and cross-functional teams.
- * Practical learning in project execution, operations management, and process optimization.
- * Opportunity to contribute to impactful business and product initiatives.
