

**Job Title: Trainee - IT**

**Experience : Final year College/Fresher**

**Location: Chennai, India**

**About OJ Commerce:**

OJ Commerce (OJC), a rapidly expanding and profitable online retailer, is headquartered in Florida, USA, with a fully-functional office in Chennai, India.

We deliver exceptional value to our customers by harnessing cutting-edge technology, fostering innovation, and establishing strategic brand partnerships to enable a seamless, enjoyable shopping experience featuring high-quality products at unbeatable prices. Our advanced, data-driven system streamlines operations with minimal human intervention.

Our extensive product portfolio encompasses over **a million SKUs** and **more than 2,500 brands** across eight primary categories.

As we continue to forge new partner relationships, our flagship website, [www.ojcommerce.com](http://www.ojcommerce.com), has rapidly emerged as a top-performing e-commerce channel, catering to millions of customers annually.

**Responsibilities:**

- Assist in developing and maintaining web applications using ASP.NET and C#.
- Write and execute SQL queries to manage and retrieve data from MS SQL databases.
- Collaborate with the development team to design, implement, and test software solutions.
- Conduct testing and debugging of applications to ensure high-quality performance.
- Work closely with cross-functional teams to gather requirements and deliver solutions that meet business needs.
- Document processes, procedures, and software specifications.

**Skills:**

**Must Have**

- Strong understanding of programming fundamentals, data structures, algorithms, and object-oriented programming concepts.
- Basic understanding of software development lifecycle and software engineering best practices.
- Good analytical, logical reasoning, and problem-solving skills.
- Basic knowledge of databases and SQL concepts.
- Understanding of web technologies, APIs, and client-server architecture.
- Familiarity with Git or any version control system is an advantage.
- Curiosity to learn new programming languages, frameworks, and technology stacks quickly.
- Ability to effectively use AI-assisted development tools (such as ChatGPT, GitHub Copilot, Claude, or Gemini) to improve productivity while understanding, validating, and testing the generated code.
- Good communication skills and the ability to work collaboratively in a team environment.

**Desirable Skills**

- Exposure to any programming language or technology stack through academic projects, internships, or personal projects.
- Basic understanding of cloud platforms (Azure, AWS, or Google Cloud Platform).
- Familiarity with REST APIs and modern web application concepts.
- Exposure to Agile development methodologies.
- Interest in emerging technologies such as AI, Machine Learning, Cloud Computing, or DevOps.

**What We Offer:**

- Competitive salary.
- Medical benefits/accident cover.
- Flexible office working hours.
- A supportive environment for learning and growth in a fast-paced startup.
