

FoodHub Online Assessment — Pre-Test Instructions

Please read all the instructions carefully before starting your test.

SECTION 1: Before You Begin

1. Check your **system compatibility** first.
 - Use a stable Wi-Fi or broadband connection. Avoid mobile hotspots or tethering.
 - Make sure your browser is updated and compatible with the test platform.
 - For the best experience, use an incognito or private browser window so that extensions do not interfere with the test.
 - You can verify system requirements at: <https://help.hackerearth.com/hc/en-us/articles/360002371373>
2. Sit in a **well-lit room**.
 - Your face must be always clearly visible to the camera during the test.
 - Avoid sitting with a bright window or light source directly behind you.
3. **Grant camera and microphone access** before entering the test.
 - The platform will take random snapshots of you during the test to ensure a fair environment.
 - **Allow camera and microphone permissions** when prompted by your browser - do this before you click 'Start Test'.
 - The **camera's web drivers should be updated before the test** to ensure a seamless experience while taking the assessment.
 - Before the test begins, a reference image will be captured. **To complete this step, simply click on the five blue pulsating dots displayed on the screen.**

 **Note:** *If you deny camera or microphone access, you may not be able to proceed with the test.*

4. **Check your email** before the test.

- You will receive an email from support@hackerearth.com in your inbox with the test link.

SECTION 2: During the Test — Important Rules

5. **Important:** Once you start the test, the timer cannot be paused.
 - You must complete the test in one continuous attempt.
 - Do not close the browser tab or window until you have submitted your final answers.
6. **Stay in Fullscreen mode** throughout the test.
 - The test will only run in Fullscreen mode.
 - Switching to another tab or window will be flagged and may result in your test being automatically submitted and closed.

 **Note:** *Tab switch(es) will terminate your test session.*

7. **Do not attempt to cheat** — proctoring is active.
 - Proctoring settings are enabled for this test. Your activity is monitored throughout the session.
 - Snapshots of you will be taken randomly during the test to check for the following:
 - Usage of phones or secondary devices
 - Another person visible in the frame
 - Another person taking the test instead
 - Candidate missing from the screen
8. **Copy-paste is disabled** in the code editor.
 - You cannot copy questions and search for answers online.
 - Selecting, copying, and pasting from external sources is disabled.
 - Do not attempt to search for answers on the internet - as this will be flagged.
9. **Plagiarism detection** is enabled.
 - Your answers will be automatically compared with other candidates' answers to detect any similarities.
 - Your answers will also be checked against online databases and resources to detect content copied from the internet.

 **Note:** *Any flagged answer may result in disqualification.*

SECTION 3: About the Test Interface

10. The test includes multiple types of questions.
 - Programming questions — solve coding problems using the built-in code editor (IDE), i.e. VS Code.
 - MCQ questions — choose the correct answer from the given options.

11. The code editor has helpful features built in.

- You can select your preferred programming language from a dropdown menu inside the editor. You can refer to the below screenshot for illustration.

- Your code is auto saved as you type, so you can safely resume from where you left off if you navigate between questions.
- Autocomplete feature is enabled - the editor will suggest code completions to help you code faster.

12. Sample test cases are provided for programming questions.

- Before submitting your final answer, you can run your code against the provided sample test cases.
- Use these to verify that your solution is working correctly.

SECTION 4: Quick Checklist Before You Start

Go through this checklist right before clicking 'Start Test':

- Stable internet connection confirmed
- Sitting in a well-lit room with face clearly visible
- Camera and microphone permissions granted in browser
- Practice test completed (link sent to your email from support@hackerearth.com)
- Browser is in incognito/private mode
- All other browser tabs are closed
- Phone and other devices are out of reach

All the best for your assessment! You've got this.
