Assessment
Prerequisites

Combined communication and aptitude assessment prerequisites

Communication and aptitude assessment is a **mandatory assessment** to further move your candidature ahead in this hiring process.

Communication		Aptitude	
Duration: 60 minutes	4 sections	Duration: 40 minutes	4 sections
• Pronunciation • Speaking / Fluency • Reading and Grammar • Comprehension and Listening		• Analytical and Logical reasoning • Critical thinking • Data analysis • Numerical ability	

Candidates will receive an email from the Superset notifications@email.joinsuperset.com with the assessment link (as per the slot). Kindly ensure to follow the instructions mentioned below and perform the system readiness check in advance.

Mandatory prerequisites

- Complete the mandatory [audio quality check](#) to ensure the audio-quality of your device and familiarize with the test environment. Please use the same device for final assessment.
- Checkout this [link](#) to understand the exclusive Do's and Don'ts for the audio check and actual assessment.
- Install MSB and test it well in advance of the scheduled assessment date to avoid any complications at the time of launch of the assessment. Refer to the [Installation Guide](#)
- Click this [link](#) to download MSB and perform the system compatibility check.
- Ensure desktop / laptop audio socket is in proper working condition and able to detect mic and the incoming voice.
- Ensure webcam is functional and well connected. You will be monitored via webcam during the assessment.
- Require stable internet connection with minimum **10** mbps speed.
- Recommend using USB connector with a mounted mic or a very good quality in-line mic. If not, audio quality problems might arise.

Important points

- Perform the **audio quality check** mentioned above as part of your system readiness check and any required installation / configuration. This check is only an audio device test & not the actual assessment. **The audio device being used for the audio quality check should be used for the final assessment as well.**
- Use "**Check System Compatibility**" link at the top to perform system readiness check and any required installation / configuration.
- Ensure that the voice through microphone is detected very clearly through the desktop / laptop.
- Take the assessment in a **quiet, noise-free and well-lit** environment.

- Ensure to have consistent and uninterrupted high speed internet connectivity - as the assessment has **audio listening questions** that can be **played only once**, beyond which it would be disabled.
- Hit "Start Test" link only at the specified test commencement time as it will be enabled only then. **The assessment login window will remain open only for 30 minutes after the scheduled start time.** You will be able to log in and start the assessments only within this timeline.
- Assessment has more than 1 section, so **do not click 'Finish Test' button until all the sections are completed.** Upon clicking 'Finish Test', a summary of the completed sections and pending sections will be shown. Please review it.
- **Complete each section within the allocated time as they are time bound.** It will automatically move to next section when the time is up.
- **Only one attempt is available.** Ensure laptop battery is fully charged / desktop is powered throughout the assessment duration and you have uninterrupted internet connection. Install MSB and perform all system checks well in advance.
- **Do not press F5 or refresh during the exam - as it would auto-submit and end the assessment.**
- In case you are facing an issue while launching MSB, please refer to the [trouble shooting document](#).
- In case of any disconnection due to power failure or internet issue, please restart your assessment immediately using the same invitation link.

Do's

- ✓ Complete the assessment in one sitting.
- ✓ Take the assessment in a quiet and well-lit space.
- ✓ Speak loudly and clearly following on-screen instructions.
- ✓ Place the mic 2 - 3 inches away to one side of the mouth. If you are using the in - line mic, please hold the mouthpiece using the chord.
- ✓ Conduct assessment fairly. Please note that toggling between screens will be considered malpractice.
- ✓ If you observe malpractice - report to GenCHRComplianceIND@cognizant.com
- ✓ Test your webcam beforehand and adjust as needed.
- ✓ Adjust indoor lighting and camera angle to make sure your face is clearly visible at all times. The background should be plain. Avoid photos, pictures, curtains, clothes and decorations as a backdrop.

Don'ts

- × Sit in locations with any background noise or echo.
- × Have a third person present during the test to avoid being reported under malpractice.
- × Use the computer mic or touch the headphone mic while answering questions.
- × Change the mic position & settings like volume control while speaking.
- × Click F5 or try to refresh the screen, doing this will auto-submit and end the assessment.
- × Click 'Print Screen' or try to copy the content while the assessment is in progress.
- × Cover the webcam at any point during the assessment or move away from the webcam range.
- × Use AI platforms like Chat GPT for any of the hiring rounds.

Resources for general troubleshooting

Please note that MSB must be downloaded and tested well in advance of the scheduled assessment date to avoid any complications at the time of launch of the assessment. For any technical support you can reach out on the details mentioned below. Ensure to check the resources below before the assessment. Click on each button to know more.

For technical queries, call +91-8047189190 (India) (please dial in +91/0), 18002656038 (United States) or drop an email to mettl-support@mercer.com. Please mention specifically that you are a part of a Cognizant drive.

High Priority Number: +91-8047190902 (please dial in +91/0)

Zero tolerance for malpractice

- The assessment platform uses AI mechanisms to track malpractice. Any candidate found to be using unfair means (like Telegram) will be disqualified from the hiring process, without notice.
- Cognizant has a zero-tolerance policy for malpractice. A disqualification may be issued at any stage of the process, as and when malpractice is detected and is solely at the discretion of Cognizant.

Technical assessment prerequisites

Technical assessment is a mandatory assessment to further move your candidature ahead in this hiring process. Your assessment will be in one of the below clusters that you have chosen during registration.

Cluster 1 - DSA using Java/ Python/ DotNet; Angular; Prompt engineering; RAG; Fundamentals on – Cloud; GenAI; Agentic AI

Cluster 2 - DSA using Java/ Python/ DotNet; React; Prompt engineering; RAG; Fundamentals on – Cloud; GenAI; Agentic AI

Technical Assessment details – Cluster 1

Cluster 1 – Programming, Angular, Prompt Engg, RAG	
Duration: 180 minutes	5 sections
DSA using Java/ Python/ DotNet	
Problem Solving, Hash Maps, Stacks, Queues, Heaps, Dynamic Programming, Greedy Algorithms, Math, Combinatorics	
Coding - Angular	
Components (Angular, Dynamic, Styling), MVC Framework Knowledge, TypeScript, Two Way Binding, Form Validation	
Coding-Prompt engineering	
Prompting techniques, Multi model prompting, Log analysis, microservices troubleshooting, extraction + normalization, error code mapping	
Coding - RAG	
Document ingestion + preprocessing, embedding creation (FastEmbed), in-memory vector indexing, module separation	
Multiple choice questions	
Cloud fundamentals, GenAI, AgenticAI	

Technical Assessment details – Cluster 2

Cluster 2 – Programming, React, Prompt engg, RAG	
Duration: 180 minutes	5 sections
DSA using Java/ Python/ DotNet	
Problem Solving, Hash Maps, Stacks, Queues, Heaps, Dynamic Programming, Greedy Algorithms, Math, Combinatorics	
Coding - React	
Basic Routing, Rendering Elements, State Management (Internal Component State), Handling Events, ES6 and JavaScript, Form Validation	
Prompt engineering	
Prompting techniques, Multi model prompting, Log analysis, microservices troubleshooting, extraction + normalization, error code mapping	
Coding - RAG	
Document ingestion + preprocessing, embedding creation (FastEmbed), in-memory vector indexing, module separation	
Multiple choice questions	
Cloud fundamentals, GenAI, AgenticAI	

The technical assessment invite email will be sent to your Superset registered email ID, and candidates must use the same ID to take the technical assessment.

Candidates will receive an email from Cognizant Technology Solutions Hiring Team [<support@hackerrankforwork.com>](mailto:support@hackerrankforwork.com) with the assessment link (as per the slot). Kindly ensure to follow the instructions mentioned below and perform the system readiness check in advance.

Important points

- Ensure to go through the Technical Assessment details (Skills covered, section details, duration) shared with you and prepare for the respective assessment.
- The assessment will be conducted on the HackerRank platform.
- **Hacker rank desktop app must be downloaded** and tested well in advance of the scheduled assessment date to avoid any complications at the time of launch of the assessment.
- Use the latest version of any of the browsers (Google Chrome / Firefox / Safari).
- Make sure your internet connection is stable and uninterrupted throughout the assessment duration.
- Ensure to go through the comprehensive [Guide](#) and take up the [Sample Test](#) to become familiar with HackerRank platform.
- It's important to start the assessment promptly at the scheduled time.
- Ensure that the code written is of good quality and testable. It'll be scanned by standard code quality tools.
- Only one attempt is available.

Do's

- ✓ Shut down all unnecessary applications and browser tabs to minimize distractions and ensure optimal system performance.
- ✓ Clear your browser cache and cookies before starting the assessment to avoid any technical glitches.
- ✓ Take the assessment on a desktop / laptop equipped with a working webcam (external or built-in) with the latest camera drivers installed and ensure smooth internet connectivity throughout the assessment.
- ✓ Test webcam prior to the assessment, as it will be required throughout the assessment.
- ✓ Ensure a backup internet connection, like a mobile hotspot, in case of connectivity issues.
- ✓ Ensure your laptop or desktop is fully charged or connected to a power source.
- ✓ Take the assessment from a quiet area with adequate brightness. Adjust indoor lighting and camera angle to make sure the face and upper body is clearly visible during the assessment.
- ✓ Have a plain background and avoid photos, pictures, curtains, clothes, and decorations in the background.

Don'ts

- ✗ Cover the webcam at any point during the assessment or move away from the webcam range.
- ✗ Have a third person present during the assessment, to avoid being reported under malpractice.
- ✗ Use any other electronic device like mobile phones, headsets/earphones, ear pods, calculators or recording devices during the entire duration of the assessment.
- ✗ Use AI platforms like Chat GPT for any of the hiring rounds.

Resources for general troubleshooting

Please note that **hacker rank desktop app must be downloaded** and tested well in advance of the scheduled assessment date to avoid any complications at the time of launch of the assessment. For any technical support you can reach out on the details mentioned below. Ensure to check the resources below before the assessment. Click on each button to know more.

Zero tolerance for malpractice

- The assessment platform uses AI mechanisms to track malpractice. Any candidate found to be using unfair means (like Telegram) will be disqualified from the hiring process, without notice.
- Cognizant has a zero-tolerance policy for malpractice. A disqualification may be issued at any stage of the process, as and when malpractice is detected and is solely at the discretion of Cognizant.

Note:

- At any point in time, if the self-profile declared by the student during the registration process is found to be false or if the student is found to have indulged in any sort of malpractice at any stage, the application will be withdrawn.
- The final decision on the shortlisting of candidates will be at the sole discretion of Cognizant.
- If selected, candidates will be subject to internal audit process. In case, any observation is found to be inappropriate, it will lead to a withdrawal of the selection.
