

## **L7 Informatics**

At [L7 Informatics, Inc.](#), our mission is to revolutionize scientific processes and data management to accelerate precision health across life sciences, healthcare, and nutrition value chains.

Our end-to-end solutions and services enable researchers to make new genomics discoveries, precision therapeutics manufacturers to create higher fidelity therapies, health systems to provide superior diagnostics and standard of care, and precision agriculture to meet tomorrow's needs.

We are seeking a motivated and detail-oriented Software Intern to join our dynamic team. As a Software Intern, you will have the opportunity to work on real-world projects, contribute to the development of cutting-edge software solutions, and gain hands-on experience in Python programming and testing methodologies.

**What you will get to do** • Collaborate with our development team to design, implement, and

maintain software applications.

- Write clean, efficient, and well-documented code in Python.
- Contribute to the development and execution of software test plans.
- Perform manual and automated testing to ensure the quality and reliability of our software products.
- Collaborate with cross-functional teams to identify and resolve software defects.
- Stay up-to-date with industry trends and emerging technologies.

## **What will make you a good fit**

- Currently pursuing a Bachelor's or Master's degree.
- Strong programming skills in Python.
- Understanding of software testing principles and methodologies.
- Familiarity with testing tools and frameworks, such as Selenium.
- Knowledge of web technologies (HTML, CSS) is a plus.
- Excellent problem-solving and analytical skills.
- Effective communication and collaboration skills.

## **What will make you stand out**

- Hands-on experience working on real-world projects.
- Exposure to industry best practices in software development and testing.

- Lifesciences and/or bioinformatics related coursework

## The Hiring Process

- A campus placement talk followed by a technical assignment (if applicable) • interviews with 2 members of the team

Even if you miss the campus placement talk, we value passion and curiosity and recognize that everyone comes with a unique background and perspective. We encourage you to apply for the “Dream Job” on our career page so that we can consider you for the right role when it the need arises.
