

About Us

MUFG Bank, Ltd. is Japan's premier bank, with a global network spanning in more than 40 markets. Outside of Japan, the bank offers an extensive scope of commercial and investment banking products and services to businesses, governments, and individuals worldwide. MUFG Bank's parent, Mitsubishi UFJ Financial Group, Inc. (MUFG) is one of the world's leading financial groups. Headquartered in Tokyo and with over 360 years of history, the Group has about 120,000 employees and offers services including commercial banking, trust banking, securities, credit cards, consumer finance, asset management, and leasing.

The Group aims to be the world's most trusted financial group through close collaboration among our operating companies and flexibly respond to all the financial needs of our customers, serving society, and fostering shared and sustainable growth for a better world. MUFG's shares trade on the Tokyo, Nagoya, and New York stock exchanges.

About the Role:

Position Title : Analyst

Corporate Title: Analyst

Reporting to : Assistant Vice President / Vice President

Location : Bangalore BCIT

Job Profile

Data Science

Key Responsibilities:

1. ETL Development and Management:
 - Design, develop and maintain ETL pipelines to extract, transform and load data from various sources
 - Ensure data quality, integrity, and consistency throughout ETL process
 - Collaborate with cross-functional teams to understand data requirements and deliver solutions
2. Data Processing and Analytics:
 - Process large Datasets using SQL, Python, PySpark, Databricks
 - Conduct exploratory data analysis to identify trends, patterns and insights
 - Work with cloud-based Data analytics platforms (AWS) to perform data processing and analytics tasks
3. Cloud Data Analytics:
 - Utilize cloud services to store, process and analyze large volumes of data
 - Implement best practices for cloud data architecture and management
 - Optimize cloud-based data workflows for performance and cost-efficiency
4. AI/ML Integration:
 - Active participation in the development and deployment of machine learning models to enhance data analytics capabilities
 - Assist in the integration of AI/ML solutions within data processing pipelines
 - Stay updated with latest AI/ML technologies and tools to bring innovative solutions to the team
5. Collaboration and Communication:
 - Work closely with Data scientists, engineers and business analysts to understand project requirements and deliver high-quality result
 - Communicate findings and insights effectively to both technical and non-technical stakeholders

Desired Skills:

- Educational Background: Bachelor's degree in computer science, Data Science, or a related field
- ETL tools: Familiarity with Datawarehouse, Data Marts, Data Pipelines, ETL tools such as Informatica PowerCenter, IDQ, DBT
- Programming Language: Proficiency in SQL, PySpark, Hive Query Language, Unix scripting
- Cloud Platforms: Hands on AWS services like Glue, Kinesis, Lambda, Apache Kafka, Athena, Step functions, Apache Airflow,

- Databases: DB2, Oracle, Amazon S3, Redshift, Amazon RDS, SQL Server, Snowflake
- AI/ML: Hands on Machine Learning model creation and libraries i.e. Tensor flow, scikit-learn
- Analytical skills: Strong analytical and problem-solving skills with the ability to work on large datasets
- Soft skills: Excellent communication, teamwork and time management skills
- Secondary skills:
 - Basic understanding of Large Language Models (LLMs) and Generative AI concepts,
 - Experience creating custom AI agents for data analysis, reporting, Agentic AI and self-sustaining / autonomous AI workflows,
 - Knowledge of data pipelines supporting AI applications, familiarity with preparing datasets for AI model consumption, ability to integrate LLM APIs into data workflows, Python libraries for AI and data processing, applying Gen AI for business insights, reporting, analytics, AI powered dashboards
 - Knowledge of popular models such as GPT, Claude, Gemini and other open source LLMs.

Equal Opportunity Employer
