

Software Development Engineer 6-Month Internship – 2025 (In-Person)

Amazon India | Campus Hiring Program

About the Role

At Amazon, we hire the best minds in technology to innovate and build on behalf of our customers. The intense focus we have on our customers is why we are one of the world's most beloved brands – customer obsession is part of our company DNA. Our interns write real software and collaborate with a select group of experienced software development engineers (SDEs) who guide interns on projects that matter to our customers.

As an intern, you will be matched to a manager and a mentor. You will have the opportunity to influence the evolution of Amazon technology and lead mission critical projects early in your career. Your design, code, and raw smarts will contribute to solving some of the most complex technical challenges in the areas of distributed systems, data mining, automation, optimization, scalability, and security – just to name a few.

In addition to working on an impactful project, you will have the opportunity to engage with Amazonians for both personal and professional development, expand your network, and participate in activities with other interns throughout your internship. No matter the location of your internship, we give you the tools to own your project and learn in a real-world setting.

Job Locations

By applying to this position, your application will be considered for all locations we hire for in India. This includes but is not limited to:

Bengaluru • Chennai • Hyderabad • Delhi • Mumbai • Pune

Duration & Timeline

Amazon internships are **full-time for 24 consecutive weeks (six months)** with start dates between January and June 2027, as per your university's academic framework.

Important Note: Amazon internships require full-time commitment during the duration. Interns should not have conflicts including academic projects, classes, or other internships/employment. Any exam-related details must be shared with the hiring manager to plan for absence. Candidates

receiving an internship offer will be required to submit a declaration of availability signed by a university authority. Internship offers are contingent upon successful submission of this declaration.

Key Responsibilities

- Collaborate with experienced cross-disciplinary Amazonians to conceive, design, and bring innovative products and services to market.
- Design and build innovative technologies in a large distributed computing environment, and help lead fundamental changes in the industry.
- Create solutions to run predictions on distributed systems with exposure to innovative technologies at incredible scale and speed.
- Build distributed storage, index, and query systems that are scalable, fault-tolerant, low cost, and easy to manage and use.
- Design and code the right solutions starting with broadly defined problems.
- Work in an agile environment to deliver high-quality software.

Basic Qualifications

- Knowledge of computer science fundamentals such as object-oriented design, operating systems, algorithms, data structures, and complexity analysis
- Knowledge of programming languages such as C/C++, Python, Java, or Perl

Preferred Qualifications

- Bachelor's degree in Computer Science, Computer Engineering, or related field
