

Software Engineering Intern – Honeywell Technologies

About Honeywell Technologies

Honeywell Technologies develops innovative solutions across Building Automation, Industrial Automation, Process Automation and Process Technologies. We are looking for passionate students who are eager to build next-generation software products, cloud-native platforms, analytics solutions, and intelligent applications that solve real-world industrial challenges.

Eligibility

- Pursuing a bachelor's degree in engineering, Computer Science, Information Science, Electronics, Artificial Intelligence, Data Science, or related disciplines.
- Pre-final or final-year students.
- Minimum 60% aggregate or 6.0 CGPA.

Key Responsibilities

- Design, develop, test, and maintain software applications and services.
- Build scalable, reliable, and secure cloud-native solutions.
- Develop REST APIs, microservices, and data-driven applications.
- Participate in debugging, performance optimization, testing, and software quality initiatives.
- Collaborate with global engineering teams across software, systems, QA, and product organizations.
- Contribute to Agile development practices, CI/CD pipelines, and Devops activities.

Required Skills

- Strong programming skills in C++, C#, Java, Python, or JavaScript.
- Good understanding of Algorithms, Data Structures, Object-Oriented Programming, and Databases (SQL/NoSQL).
- Understanding of software development lifecycle, Agile methodologies, and testing concepts.
- Familiarity with RESTful APIs, cloud platforms (Azure/AWS), and modern software engineering practices.
- Strong analytical, problem-solving, and communication skills.

Preferred Skills

- Knowledge of cloud-native application development, microservices, Docker, Kubernetes, and DevOps tools.
- Exposure to Big Data, Analytics, Apache Spark, or Databricks.
- Understanding of AI/ML, Generative AI, LLMs, Prompt Engineering, or RAG concepts.
- Familiarity with Git-based development workflows and automation frameworks.

Desired Attributes

- Passion for technology and innovation.
- Strong learning agility and curiosity.
- Ability to work effectively in collaborative, cross-functional teams.
- Critical thinking, ownership mindset, and customer focus.

Why Join Honeywell Technologies?

Gain hands-on experience working on real engineering projects, modern software platforms, cloud technologies, and emerging digital solutions that support Honeywell Technologies businesses. Come join us and be a #futureshaper!

Equal Opportunity Statement

Honeywell Technologies is an equal opportunity employer. Qualified applicants will be considered without regard to age, race, creed, color, national origin, ancestry, marital status, affectional or sexual orientation, gender identity or expression, disability, nationality, sex, religion, or veteran status
